HA PCB Installation Procedure (1)

1. Remove the front panel, service lid, and front grille in accordance with the installation manual for the air conditioner.

2. Install the HA PCB.
   - Installation procedure for the HA PCB differs by model type. Refer to the relevant section.
   - For Type A model: Proceed to "HA PCB Installation Procedure (2) Type A".
   - For Type B model: Proceed to "HA PCB Installation Procedure (2) Type B".

3. The installation work can be conducted without removing the electrical wiring box.

   - Connect the wireless LAN connection adapter to the S21 connector in accordance with the installation manual for the air conditioner.

4. The installation work is conducted without disconnecting the inter-unit wire.

5. The installation work is conducted while connecting to a wireless LAN connection adapter (wireless LAN access point).

6. The installation work box cover and electrical wiring box (if it was removed) to their original positions.

HA PCB Installation Procedure (2)

1. Remove the electrical wiring box cover.
   - Disengage the hooks to remove the electrical wiring box cover.

2. The electrical wiring box can be removed without disconnecting the inter-unit wire.

3. The installation work can be conducted without disconnecting the inter-unit wire.

4. The electrical wiring box can be removed without disconnecting the inter-unit wire.

5. If there is a workspace on the right-hand side of the indoor unit, the installation work can be conducted without removing the electrical wiring box.
   - Connect the HA PCB to the indoor unit, after making the connection.
   - Return the front grille, service lid, and front panel to their original positions.

6. The installation work box cover and electrical wiring box (if it was removed) to their original positions.

7. Return the front grille, service lid, and front panel to their original positions in accordance with the installation manual for the air conditioner.
Wireless LAN Connection Adapter Installation Procedure

1. Remove the upper case of the wireless LAN connection adapter. Press a flat-head screwdriver into the slit between the upper and lower cases of the wireless LAN connection adapter to remove. (Be careful not to damage the case.) Use a flat-head screwdriver with an edge width (0.2 inches (5 mm) or wider is recommended.)

2. Attach the <connection cord to the wireless LAN connection adapter.>
   1) Attach the connector of the <connection cord to the lower case of the wireless LAN connection adapter.>
   2) Fasten the <connection cord to the upper case of the wireless LAN connection adapter.>

3. Install the lower case of the wireless LAN connection adapter to a wall, a pillar, or similar location.
   - Install the lower case so that the upper case can be easily removed for maintenance purposes.
   - Do not install outdoors or anywhere it is likely to get wet.
   - Do not install near the sensor part of the unit.

4. Return the adapter case to its original condition. Close the adapter by inserting the top of the upper case into the top of the lower case. Check that the adapter case is securely fastened.

5. Turn on the power supply, wait until the initialization is complete, and check that the [POWER] lamp of the wireless LAN connection adapter lights up.

Configuring Connection Settings (1)

1. Check that the [POWER] lamp is continuously lit and the [RUN] lamp is blinking.
   - If the [POWER] lamp is lit and the [RUN] lamp is not lit, hold down the [MODE] button on the adapter for about 3 seconds to prompt the [RUN] lamp to begin blinking. (Blinking begins in about 30 seconds.)

2. Press the [WPS] button on the router (wireless LAN access point).
   - Operation procedures for the [WPS] button vary by router (wireless LAN access point).
   - For details, refer to the instruction manual for the router.

3. Hold down the [SETUP] button on the adapter for about 2 seconds.
   - The [RUN] lamp will begin to blink more rapidly, and will change to a continuous light once a connection has been established between the router (wireless LAN access point) and the adapter.
   - If the connection still cannot be established, follow the procedure in “Advanced setup.”

4. Connect the smartphone (tablet PC) and the router (wireless LAN access point).
   - A connection can be established by opening the smartphone’s Wi-Fi network list, selecting the [SSID] (DaikinAP *****) shown on the serial number sticker, or the [WPS] button.

5. Tap the installed app [Daikin Comfort Control] to start it.
   - If the connection condition is listed in the units overview screen, setup is complete. If it is not listed, tap [Refresh] in the top right corner of the units overview screen.

When this happens

- [RUN] lamp does not light up (continuously)
- [RUN] lamp blinks
  - Follow Simple setup or Advanced setup again.
  - Check that the [SSID] and password for the adapter are entered correctly.
  - The [RUN] lamp lights up after you switch the [WPS] button on the wireless LAN connection adapter.

Troubleshooting

- For inquiries concerning after-sale service, contact your dealer and advise them of the following details:
  - Model name
  - Date of installation
  - Conditions at the time of failure (as precisely as possible)
  - Your address, name, and telephone number

- This telecommunication equipment is in compliance with FCC/IC requirements.

- Any unauthorized changes or modifications to this equipment will void the user’s authority to operate the equipment.

- This device complies with Part 15 of FCC Rules and Industry Canada business or RSS standards. Operation is subject to the following conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

- This equipment complies with FCC radio frequency exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. The equipment should be installed and operated keeping the radiator at least 10 inches (25 cm) or more away from person’s body.
